Supply Continuity Pulse
Capability

IDENTIFY AND PREPARE FOR SUPPLY DISRUPTIONS

The global scale of supply chain disruption today is unprecedented. Supply networks have become more connected and interdependent than ever before, making it critically important for you to remain closely aligned with your suppliers so you can assess threats to continuity of supply and respond effectively.

Industry leaders use multiple mechanisms and data sets to achieve this, and SAP Ariba and Qualtrics would like to help. That’s why we’re offering the Supply Continuity Pulse.

EFFICIENTLY MEASURE AND MAXIMIZE YOUR SUPPLY CHAIN STRENGTH

Supply Continuity Pulse is a free,* cloud-based capability that combines the experience management knowledge of Qualtrics with the procurement and supply chain collaboration expertise of SAP Ariba. It allows you to quickly survey suppliers and receive summarized results, helping you identify potential supply constraints, assess suppliers’ ability to navigate remote and furloughed workforces and plant closures, gauge business continuity plans, and assist suppliers if needed. Easy-to-use features include:

• A preconfigured survey that you can modify to suit your needs
• Survey distribution to the suppliers and individuals you choose
• A preconfigured analysis and report summarizing suppliers’ survey responses

GET STARTED WITH THREE SIMPLE STEPS

To begin using Supply Continuity Pulse, take these simple steps:

1. Go to https://www.ariba.com/programs/supply-continuity-pulse, select “Get started” or “Start now,” and then click “GET STARTED” on the Supply Continuity Pulse tile to request a free Qualtrics account (or use the alternate prompts if you already have an account).
2. Enter your email address, check your email, and verify your email address.
3. Set up your account by completing a brief user profile.

That’s it! Now you can access your account to create a survey by choosing “COVID-19 XM Solutions” / “Supply Continuity Pulse” and following the brief, guided process to configure it to match your organization’s needs.
