

Electronic Invoicing with Ariba® Network

Transforming Accounts Payable into a Strategic Asset

Make Procurement Awesome with Electronic Invoicing

Automatically detect invoice errors and exceptions with the electronic invoicing capabilities of Ariba® Network. Free up accounts-payable resources to:

Help procurement enforce compliance policies

Support finance and treasury processes

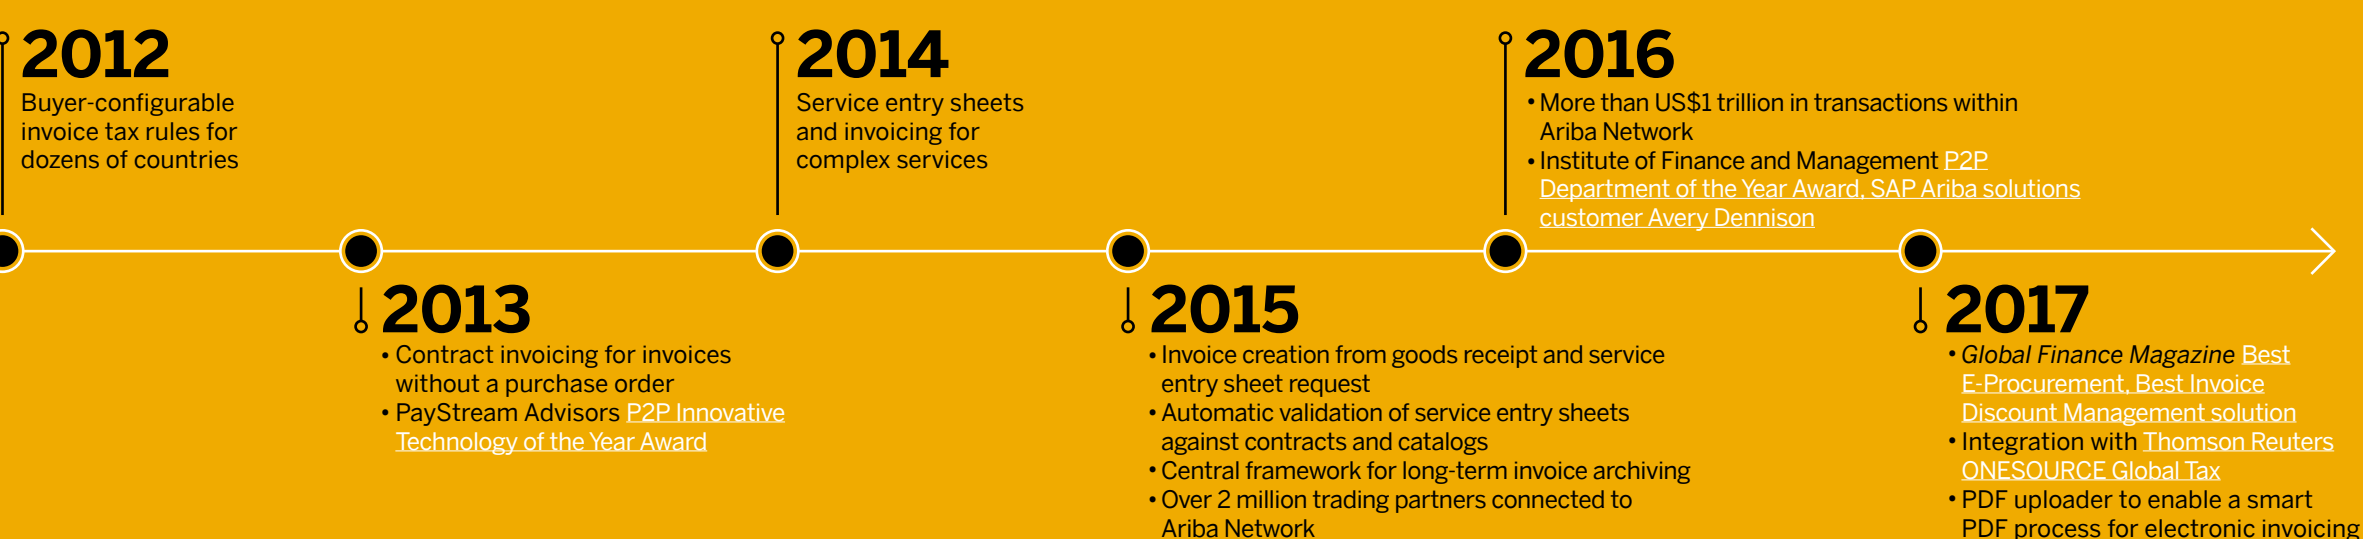

Improve bottom-line results

“ With SAP® Ariba solutions, we no longer have to chase invoices and print duplicates. And our suppliers love the new process. Once they get faster visibility into invoice status and receive payments, they become strong advocates. ”

Ed Aderman, Financial Program Manager, Global Procurement, RELX Group

Unmatched Innovation

Accounts Payable: From Overhead to Strategic Resource

By transforming your accounts-payable processes with electronic invoicing, you can:

Engage suppliers with paperless interactions

Ensure consistent compliance with contract terms

Uncover root causes of recurring invoice errors

Identify opportunities for early-payment discounts

Drive check-to-electronic payment initiatives

Companies using Ariba Network are realizing significant results such as:

60%+
Lower invoice-processing costs

98%+
Touchless invoice processing

\$1 million to \$2 million
Early-payment discounts for every \$1 billion of targeted spending

Grow Strong with Ariba Network

>\$1 Trillion
Commerce transacted annually

2.8 million
Connected companies

190
Countries

1
Company added to Ariba Network every minute

Value to Suppliers

“ Suppliers can track invoice status and payment schedules online, which reduces the volume of help-desk calls. What’s more, many are taking advantage of early-payment offers to improve their cash flow. ”

Hanif Dhrolia, E-Commerce Manager of Supply Chain Central Services, Operations and Enterprise Supply Chain, BC Hydro
